

Smith Mountain Lake is a No Discharge Zone

A **No Discharge Zone** (NDZ) is a body of water into which the discharge of sewage (whether treated or untreated) from all vessels is prohibited. It is illegal to discharge untreated sewage from vessels or boats in all Virginia waters.

In a designated NDZ, it is also **illegal to discharge any treated waste from vessels equipped with Marine Sanitation Devices** (MSDs). U.S. Coast Guard (USCG) regulations require all vessels to disable the MSD discharge capability while operating in waters designated as a NDZ.

Smith Mountain Lake NDZ:

- Includes waters above the Smith Mountain Dam upstream to the 795.0 foot contour line (normal pool elevation) in all tributaries
- Includes waters to above the confluence with Back Creek in the Roanoke River arm
- Includes waters to the Brooks Mill Bridge (Route 834) on the Blackwater River arm
- The NDZ is approximately 20,000 acres in area, forms 500 miles of shoreline, and is bordered by the counties of Bedford, Franklin and Pittsylvania

Smith Mountain Lake is designated as a public water supply and must meet state water quality standards accordingly. There are 19 marinas with pump-out facilities on the lake in order to accommodate recreational boater waste. The lake is best known for its tourism and recreational opportunities including boating, fishing, swimming and shoreside activities. The area surrounding the lake contains public access areas, beaches, campgrounds, picnic areas, hiking trails, and parks.

For information on pumpout facilities at Smith Mountain Lake visit our website:
